

## NO RUST. NO FUSS

Filling out a complete line of stainless steel tubular light truck and SUV products is the brand new Force Automotive Black powdercoated Stainless Steel Sidebars. Engineered out of rust-free 304 stainless steel tubing with a black semi-gloss powdercoat finish, these bars provide the ultimate in rust-free protection. Installation is easy, using the heavy-duty black powdercoated mounting brackets and plated hardware. Force sidebars are mandrel bent for wrinkle-free bends, and to ensure maximum strength, each step is stamped into each bar and topped with a tough composite step pad. Instructions and installation is designed for the first time do-it-yourself customer using simple hand tools. Like all Force Automotive stainless steel products, these bars are backed with a lifetime warranty against rust. For more information about these and other Force Automotive stainless steel products, contact Force Automotive Products, Dept. STTR, 5306 Industrial Dr., Huntington Beach, CA 92649, or call (714) 375-9870.

## PUTTING THE CLASSIC IN YOUR NEWER TRUCK

There's only so much you can do to maintain that "new vehicle" look. Washing helps protect the paint, vacuuming keeps the carpet looking good, and that's about it. Factory seats and door panels usually start showing wear after a few years no matter what you do, and it's all downhill from there. But what if you could make that tired interior look and feel as good or even better than new? Classic Soft Trim has been manufacturing aftermarket leather interiors for more than 20 years and has over 2,500 patterns for popular domestic and import applications. Classic Soft Trim's Touring Series interior packages for most 1988 and newer GM trucks and SUVs feature luxurious automotive-grade leather, through-dyed for long-term appearance and hand-selected for grain and softness by professional inspectors prior to being laser cut and meticulously sewn by skilled craftsmen. Simply order your kit and have it installed by one of over 100 conveniently located authorized installation centers. The factory leather or cloth on your seats, door panels and center console (where applicable) will be carefully replaced with new Classic Soft Trim leather upholstery. Wood-grained dash accents are added to complement the beautiful leather-wrapped and wood-grained steering wheel, and Touring Series logo exterior badges complete the transformation. Whether you choose the Touring Series interior or one of CST's other terrific styles for your Suburban, Yukon, Tahoe, Silverado, or Sierra, you'll drive comfortably knowing your new interior meets or exceeds original equipment standards and is backed by an amazing three-year/36,000-mile limited warranty. For more information about Touring Series leather interiors for GM trucks and SUVs, visit Classic Soft Trim on the Web at [www.classicsofttrim.com](http://www.classicsofttrim.com) or call them toll-free at (800) 460-0640.

## DROP IT LIKE IT'S HOT

McGaughy's Suspension has done it again! When everyone else said a drop spindle couldn't be done, they said it could and decided to prove themselves once again as a leader in the suspension industry. Their world's first 2-inch drop spindle (patent pending) for the 2000-plus Escalades, Denali's, SS trucks, four-wheel drives, and all-wheel drives debuted in April 2003 and has won the General Motors 2003 SEMA Design Award for "Most Innovative Product" (the spindle is also available for 2WD Trucks, Tahoes, Suburbans and Avalanches). Some of the great features about the spindle include computer designed and machined to use factory GM suspension components, including, a-frames, ball joints, tie rod ends, etc. and in their stock location, maintaining factory front end geometry and alignment. Also, because there is not any need to flip the ball joints, sway bars or a-frames and the steering arms remain in the correct position, "bump-steer" does not occur. The McGaughy's spindles also maintain the stock tire and wheel track width, not moving the wheels outward at all. The McGaughy's spindle creates the appeal of a lowered vehicle without the sacrifice of the factory ride! For more information, contact Mike McGaughy's Classic Chevy Parts, Inc., Dept. STTR, 5680 W. Barstow, Fresno, CA 93722; (559) 226-8196; Fax (559) 277-0457; [www.mcgaughys.com](http://www.mcgaughys.com).
